

SevaMitra Knowledge Corpus — SevaMitra RAG Policy, Profile Matching, Source Integrity & Anti-Hallucination

Scope

Retrieve semantically relevant chunks first. Prefer authoritative government sources and the newest applicable source.

Policy/Answer rule

For eligibility questions, ask only the minimum missing profile data: State/UT, age band when relevant, education/course, category where relevant, income band, disability/special status, employment/farmer/student status.

Policy/Answer rule

Return: direct answer; eligibility; documents; application steps; fee/benefit when verified; deadline/status when verified; official URL; source authority.

Policy/Answer rule

If no relevant verified information is retrieved, say so rather than using general model knowledge.

Policy/Answer rule

Source shown in the UI must correspond to the actual retrieved evidence used for the answer.

Policy/Answer rule

State-specific services require State/UT context. Central and state schemes must not be conflated.

Policy/Answer rule

Current information such as latest dates, deadlines, fees, vacancies, exam schedules and scheme openings must use the newest official source.

Policy/Answer rule

Empty fields should say 'Not specified in the retrieved official source' instead of showing '-' when the UI supports it.

Policy/Answer rule

Never store or expose API keys, passwords, OTPs or other secrets in the knowledge base.

Source strategy: Treat India.gov and the responsible Ministry/Department/State/UT portal as discovery and authority sources. The knowledge base should be refreshed when official rules change.
